VITAL STATISTICS

Year Founded: 1985

WHO WE ARE

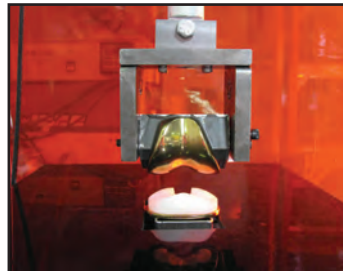

For more than 25 years, medical device firms have turned to Accutek for product conformance, regulatory testing, and failure analysis testing. Our clients range in size from small to large and include multinational companies, research labs, universities and startup ventures. In addition to orthopedics, Accutek leverages experience and best practices from a variety of industries, such as aerospace, defense, energy and industrial manufacturing to deliver innovative and advanced testing programs. ISO 17025 (A2LA) Accredited.

MAJOR MARKETS

Within the orthopedic medical device market, Accutek works with firms of all sizes and managed standard and customized testing initiatives for a variety of implants, such as:

- Hips
- Knees
- Spinal Assemblies and VBR's
- Bone Screws, Rods and Plates
- Extremities
- Small Bone
- Dental
- Device Instruments
- And much more.....

SERVICES OFFERED

We recognize how mission-critical your testing requirements are. Whether a part requires testing for regulatory approval or you need to compare your product to given specifications, Accutek can address your needs. We will work with you to develop

a cost-effective and timely testing solution. We endeavor to understand your needs prior to embarking on a test. Your test is done right – the first time.

Our team of engineers and testing facility will provide you with the data and analysis you require. Accutek Testing Laboratory specializes in a range of services, including:

- Mechanical Testing
- Metallurgical Testing
- Failure Analysis
- Fatigue Analysis
- Product Development
- Welder Qualification
- Customized Test Development

Select medical implant testing includes:

- ASTM F1717
- ASTM F2077
- ASTM F2423
- ISO 7206
- And much more.....
