## VITAL STATISTICS

Year Founded: 1985  
Number of Employees: 250  
Number of Facilities: 2 – Locations in VA & RI  
Annual Sales: \$40 Million

## WHO WE ARE

Cadence, Inc. is ranked among the top life science companies providing outsourced design and manufacturing solutions for surgical devices and scientific applications. The Cadence reputation as the market expert for improving product performance comes from a commitment to using innovative metals fabrication technologies. The world's only IncisionLab enables better performance using our *Define. Do. Measure.* approach to new product design and development. Our proprietary "sharps" processing technologies enable Cadence to supply the most critical components and sub-assemblies for medical devices, scientific, and industrial applications.

## MAJOR MARKETS

- Analytical Science
- Cardiology
- Drug Delivery
- Fluid Delivery
- Interventional Therapy
- Neurology
- Orthopedics
- Biopsy
- Diagnostics
- Endoscopy
- General Surgery
- Minimally Invasive Surgery
- Ophthalmology
- Pharmaceutical

## SERVICES OFFERED

What makes Cadence different from other companies? We make devices and diagnostics better. While other companies make pieces and parts, we make a difference!

Our technology strategy for sharps components and subassemblies builds on our prior experience in the razor blade and specialty needle industries. Our IncisionLab enjoys the reputation in the market as the Center Of Excellence for improving ultimate product performance for our life science partners.

"ADRENALINE" Rapid Prototyping – Sales, engineering and manufacturing resources focused on design for manufacturability and assembly, rapid prototyping, and pilot production.

### We provide operational excellence in:

- Cleaning and Passivation
- Contract Manufacturing
- Custom Packaging – Assembly
- Design Engineering Assistance
- EDM – Sink and Wire
- Electro-Chemical Edge Enhancement
- Forming – Deburring
- IncisionLab
- ISO 13485 and 9001 Registered
- Laser Cutting – Welding – Marking
- Machining – Swiss – Screw – CNC
- Micromachining
- Overmolding – Insert Molding
- Performance Enhancing Coatings
- Photo Etching
- Pointing – Needle and Wire
- Rapid Prototyping – "ADRENALINE"
- Sharpening – Grinding
- Stamping – Machining – Heat Treating
- Supply Chain Management
