MAJOR MARKETS

FMI Medical specializes in satisfying the manufacturing needs of OEM's in the orthopedic, spinal, small bone and joint replacement markets.

SERVICES OFFERED

FMI has combined a well designed facility with the highest level of employee and the most modern technology to best serve the demanding medical manufacturing market. The comprehensive in-house machining capabilities include: Swiss Turning, Multi-Axis CNC Milling, CNC Multi-Tasking Technology, CNC Grinding, Gun Drilling, Wire and Sinker EDM.

Our in-house Metal Finishing Capabilities include: Electro-Polish, Passivation, Roto-Finish, Bead Blast, Buffing, Polishing, Sanding, Heat Treat, Laser Marking, Assembly and Packaging.

We have a high level of programming and machining expertise that have opened the doors to many OEM's as we are challenged with their most complicated and demanding parts. After completing many of these initial projects our customers frequently comment that we are "convenient" and "easy" to work with. We strive to communicate with our customers throughout the quoting and manufacturing process. Working thru initial projects with our customers help us develop the trust needed for long term success.

VITAL STATISTICS

Year Founded: 1999
 Number of Employees: 60
 Number of Facilities: 1 – 57,000 Sq. Ft.
 Certifications: ISO 13485:2003

WHO WE ARE

FMI Medical Instruments was founded in 1999 by Jasalyn and Chad Falciani to provide innovative solutions to the most demanding medical device manufacturing challenges. The result of this vision and commitment was seen by a rapid growth in our orthopedic manufacturing. Because of the rapid growth, in 2006 FMI moved into a new, specially designed, medical device manufacturing facility.

In December of 2008 FMI Medical was acquired by Squadron Capital LLC. Squadron Capital is a Connecticut based investment group that seeks to buy and hold select companies as long term investments and to assist in the leadership in executing their respective business plans. Squadron's relationship with FMI has provided the company exceptional financial backing and support. We believe that FMI's expertise and commitment backed by Squadron's resources has created one of the strongest and most technically competent contract medical manufacturers in the US.
