WHO WE ARE

Greatbatch Medical develops and manufactures vital technologies used in medical devices for the cardiac rhythm management, neuromodulation, vascular access and orthopaedic markets.

The Orthopaedic Implants, Instruments & Delivery Systems Group supplies a wide range of products and services including orthopaedics products, sterile packaging, HA coating technology, as well as the design and manufacture of sterilization cases and surgical instruments. Built on the legacy of Swiss high-precision manufacturing and with over 20 years' experience in the medical field, we're dedicated to innovation, reliability and operational excellence while supporting the advancement of medical technologies and procedures.

MAJOR MARKETS

Joint Reconstruction, Trauma, Spine

SERVICES OFFERED

Hip Replacement

We offer a full portfolio of products and instruments for hip procedures that have been carefully engineered and manufactured for today's minimally invasive procedures. Our elevated standards ensure longer durability, higher precision, and improved cleaning.

Fracture

An extensive range of fracture fixation implants and instrumentation are manufactured by Greatbatch Medical. These include the IM Flex reamer system which uses nitinol tubes to give the required flexibility with fewer cleaning issues than reamers made from springs.

Delivery Systems

Greatbatch Medical develops and manufactures a variety of Delivery Systems for implant cases and trays. Available in stainless steel, aluminum and vacuum formed plastic, our delivery systems come with our innovative screen-printing graphic artwork to enhance the visual presentation, and to help users identify items. In addition to our customized delivery systems, we also have several standard cases that include our line of reamers and handles.

Spine Fixation

We supply a wide assortment of spine fixation instruments each fully engineered and manufactured with our world-renown precision manufacturing skills.

Services

Let our experienced team of designers and engineers build exactly the instruments and implants you need for your specific application. Our custom manufacturing facilities and processes will ensure that your product is designed and manufactured to the same high standard of quality that you've come to expect from Greatbatch Medical. We specialize in product design giving consideration to instrument use, surgeon-handling and cleaning.

Our recently opened design center in Warsaw, Indiana offers opportunities to develop products to complement existing systems or design new products to help you meet your needs. We have recruited an experienced team of Orthopaedic Technology veterans and invested in the latest rapid prototyping machines.
