VITAL STATISTICS

Year Founded: 1956
Number of Employees: 30
Number of Facilities: 1

WHO WE ARE

In the world of orthopedic and arthroscopic surgical tools, one name distinguishes itself from the rest—and has for over two decades: Huron Tool & Cutter Grinding. What began as a modest tool and cutter grinder back in 1956 has evolved into a proven technology leader in surgical cutting tools. Huron has been recognized as the “go-to” company – It’s a reputation we’ve earned through hard work and dedication, and we consider it our ongoing mission to excel.

MAJOR MARKETS

As a leading supplier of specialized cutting tools, our achievements have created opportunities in various markets. Huron now focuses its resources on supplying the orthopedic community with instrumentation used in the Arthroscopic, Spine, Reconstructive and Trauma segments.

SERVICES OFFERED

Not only does Huron bring outstanding innovation to the manufacture of standard orthopedic and arthroscopic cutting tools and instruments, but we also actively collaborate with engineers and inventors worldwide in the creation of new and

groundbreaking tools – from the common to the complex. Huron Tool ensures that our manufacturing capabilities remain industry defining in every way. Each year we invest in advanced new equipment to remain on the vanguard of instrument manufacturing, ensuring better costs, shorter lead times and long term customer satisfaction. Leveraging the latest in Robotic CNC Equipment, CAD/CAM Support and Solidworks Software, these versatile capabilities and services include:

- Robotic CNC Manufacturing:
 - Cutter Grinding, Screw Machines, Gundrill, Wire EDM, Milling
- Laser Marking & Etching
- Heat Treating, Electropolishing, Passivation & Anodizing
- Titanium Nitride & Chrome Coating
- New Product Development & Prototype Design
- ISO 9001:2008 Certified Quality Assurance
- In-House Comparative Performance Testing

Within Huron's own in-house testing and inspection center, we are able to compare geometric designs to ensure product consistency. Bottom line: When a tool ships from Huron's doors, it is proven to perform optimally.

PRECISION. PRODUCT. PERFORMANCE.

ENGINEERING EXCELLENCE
In the world of orthopedic and arthroscopic surgical tools, one name distinguishes itself from the rest – and has for over two decades: Huron Tool & Cutter Grinding. What began as a modest tool and cutter grinder back in 1956 has evolved into a proven technology leader in surgical cutting tools. Today, a half-century later, we remain a family-owned business dedicated to excellence in every measure. We push the leading edge of manufacturing technology to engineer instruments of uncompromising clinical performance. Huron tools are second to none.
