WHO WE ARE

Orchid Orthopedic Solutions is a worldwide leader in contract design and manufacturing solutions for the orthopedic, dental, and cardiovascular markets. Orchid's key mission is to be the leader in contract medical design and manufacturing by compressing time to market, providing new technology, and being the best total supply-chain value. The company meets the ISO 13485:2003 international standard for medical devices and related services that consistently meet customer requirements and regulatory requirements. Orchid provides innovative design & development, implant manufacture, advanced machining, plastic technology, instrument manufacture, implant coatings & surface treatments and packaging services.

MAJOR MARKETS

Orchid Orthopedic Solutions specializes in implants, instruments, and innovative technologies for the following markets: reconstruction, trauma, spine, sports medicine, orthobiologics, extremities, dental, and medical devices.

SERVICES OFFERED

Orchid Orthopedic Solutions' contract design and manufacturing divisions offer the following products and services: contract design and development (e.g., implant and instrument systems, design troubleshooting, customs and specials, and gage design and fabrication); quality and regulatory consulting services (e.g. quality system development, process validation and regulatory strategy and submissions); near-net forging (e.g., joint and bone replacement components, plates, and extremity parts); advanced machining (e.g., implants, surgical instruments, screws, nails, plates, and joint replacement parts); medical-grade precision-machined and molded plastic products (e.g., medical devices, implants, components, and delivery systems); and HP, TPS, and RBM, porous, and bead coatings and surface treatments (e.g., implants). New technologies, products, and design innovations are constantly being developed for Orchid customers.
