## WHO WE ARE

Orthomedic is an ISO 13485 and ISO 9001 certified contract manufacturer for Orthopaedic Spinal & Trauma implants and instruments. We have the expertise to produce high quality orthopaedic implants and provide value-added engineering and design support services to ensure product's highest performance and comply with regulatory requirements.

## MAJOR MARKETS

United States of America, European Countries, ASEAN

## SERVICES OFFERED

Penang-based Orthomedic stands strong; backed by over twenty years of experience in precision machining, mechanical

engineering and designing. It was a passion to excel that led the company to diversify into the ever-growing orthopaedic fields. Well supported by a team of dedicated individuals, Orthomedic has today created a niche market for itself and continues to grow to new heights.

We contract manufacture highly-engineered orthopaedic implants and instruments with complex assemblies for:

- Trauma implants
- Spinal implants
- Customized orthopaedic trays and instruments

In keeping with our promise to deliver only the best to our customers, we've invested in state-of-the-art equipments. Our facilities feature high precision machinery, software and skilled workforce. Our resources and capabilities translate customers' development and manufacturing needs into premier turn-key solutions both regionally and internationally.

We design for manufacturability and process optimization through close liaison with our customers in engineering and project management while keeping relentless focus on lead-time and competitive pricing.

Exploit our strategic manufacturing location to venture into Asian Market, benefit from professional advice on precision machining and mechanical engineering and designing profit from our continuous upgrading of skills and improvement of methods. We pride ourselves for being easy to deal with and offer a high degree of flexibility in business collaboration ideas that facilitate to increase and improve your profit margins.
